

EnviroVantage honored for environmental excellence

May 01, 2011

EPPING — EnviroVantage recently received the National Demolition Association's Environmental Excellence Award for work it performed at York Mills in Saco, Maine. The award recognized EnviroVantage's quality workmanship in maintaining Environmental Stewardship, a major focus of NDA.

The award was presented to EnviroVantage President Scott Knightly at the NDA's annual meeting held at The Mirage Hotel in Las Vegas.

"This is a team award" Knightly said. "Our goal on every project is to maximize the environmental cleanup and this award is a reflection of the quality of work that our team members perform on a regular basis."

The York Mills project involved the redevelopment of an 1829 textile mill building on an island between Saco and Biddeford. The cleanup included **removing hazardous materials and sandblasting** while retaining the integrity of the old hard maple floors, bricks and stairwells. The project included removing and replacing of almost 700 windows, some as tall as 16 feet high.

Written and visual descriptions of the project were displayed at the Mirage Exhibition Center during the NDA's annual conference and EnviroVantage's work will be featured in the May/June issue of Demolition magazine.

EnviroVantage is a two-time winner of Business of the Year and New England's most trusted environmental contractor, providing services such as the removal of lead paint, asbestos and mold, demolition, disaster recovery, surface preparation and cleaning. For information, visit www.envirovantage.com.
